Dear Mr. [REDACTED]:

Reference is made to letter of undersigned, same subject, dated 31 August 1953. Item 15 of the attachment to reference letter disapproved the Contractor's submission of the compressor on the basis of its not having the number of cylinders or the capacity modulation steps as originally specified.

This Office has been contacted by the local representative of the manufacturers of the equipment submitted, as a result of which it has been decided to withdraw the objection to the said submission.

Approval is also granted for use of the other items of equipment covered in the letter of [REDACTED]

25X1A

Very truly yours,
